2.DashBoard

1.

The screenshot shows the Elastic Stack Management interface. The top navigation bar includes the Elastic logo and a breadcrumb trail: Stack Management > Index patterns > newsletter*. The left sidebar contains a 'Management' section with various categories: Ingest (Ingest Node Pipelines), Data (Index Management, Index Lifecycle Policies, Snapshot and Restore, Rollup Jobs, Transforms, Remote Clusters), Alerts and Insights (Rules and Connectors, Reporting, Machine Learning Jobs), Kibana (Index Patterns, Saved Objects, Tags, Search Sessions, Spaces, Advanced Settings), and Stack (License Management, 8.0 Upgrade Assistant). The main content area is titled 'newsletter*' and shows a 'Time field: 'date'' indicator. Below this, it says 'View and edit fields in newsletter*. Field a'. There are three tabs: 'Fields (18)' (selected), 'Scripted fields (0)', and 'Field filt'. A search bar is present. The list of fields includes: _id, _index, _score, _source, _type, category, category.keyword, company, company.keyword, and contents. At the bottom, it shows 'Rows per page: 10' with a dropdown arrow.

Index Patterns에 들어가세요.

대시보드로 들어가서 url 연동이 되었는지 확인해볼게요 😊

url 연동이 성공하였습니다.

키바나 대시보드에서 집계 value로 URL 링크 걸기

개요 키바나에서 Visualization 중에 Table을 정보 표시 용도로 사용할 일이 꽤 있다. 이때 Table의 내용(value값)을 기반으로 하이퍼 링크를 걸 일이 있었는데 방법을 찾아 본 후 공유 한다. 핵심 Index에서 String인 필드를 URI로 포매팅을 바꾸는 것이다. 방법 키바나의
